**Legal obligation/requirement in terms of insurance**

- Check validity dates of the insurance certificate

- Insurance certificate must be on behalf of Customer's name or the company that signed the contract.

- The French Sport's Code provides that Customer must hold a "organiser's liability insurance policy". The liability insurance certificate must specifically mention the activity of organisation of sporting events of motor vehicles on speed circuits.

The French Sport's Code sets minimum compensation amounts by damage that must be equivalent to :

- For compensation of personal injury other than those under civil liability : 6.100.000 euros per claim.
- For compensation of property damage other than motor vehicle civil liability : 500.000 euros per claim.

Without the information above mentioned, the certificate is deemed invalid and the customer can't access to the track.

- There is another option :

If the customer's activity consists of organising circuit driving services, the customer can provide with a professional civil liability insurance policy. However, the certificate must explicitly mention that it covers the activity of organizing circuit driving services.

The maximum compensation limit set up on the certificate must be equivalent or exceed the amounts mentioned above.
